

Computing Progression

Vision:

To be digital literate by using technology in new and imaginative ways to become creative problem-solvers by collaborating and presenting media in an ever-changing technological world.

At The Rivers CofE Multi Academy Trust, we aim to integrate technology to empower pupils to have the necessary skills and understanding to become creative problem-solvers. We want to spark pupils' curiosity, enabling them to be digitally literate in using a variety of hardware and software to collaborate, present and become critical thinkers. Technology has the power to transform learning, and we aim to enable all pupils to succeed by ensuring they are responsible global citizens who can use technology in new and imaginative ways.

Implementation

Our curriculum is carefully structured to develop pupils' computational thinking concepts and approaches through a variety of unplugged [without a computer], screen or physical activities. We have discrete computing lessons taught weekly but aim to embed technology as a tool to enhance pupils' learning across the breadth of the curriculum.

The Computing Curriculum is comprised of three key areas of study: Computer Science; Digital Literacy and Information Technology.

Computer Science is the foundation element of the computing curriculum. Pupils in EYFS initially write and follow algorithms, leading to programming robots around mazes to eventually, in UKS2, coding maths quizzes and a platform game using a block-based coding language [Scratch]. Pupils are encouraged to develop key computational thinking strategies such as tinkering, decomposition and debugging to ensure they become critical thinkers and apply these skills across the breadth of the curriculum. Pupils also study the hardware components of devices and how simple networks work.

Information Technology units are designed for pupils to solve problems with the aid of technology, for instance, designing a new playground, making a story come to life through animation, editing images and audio for a meaningful purpose. We aim for pupils to leave The Rivers CofE Multi Academy Trust with a variety of skills across devices to enable them to make the appropriate choices when deciding how to present or solve problems with the aid of information technology.

Digital Literacy. Pupils will learn to be responsible users of technology to engage and thrive in the digital world. It is at the forefront of all lessons and is embedded through class assemblies and e-safety days throughout the year. Pupils from EYFS to Year 6 are taught the underpinning knowledge and behaviours to be discerning users of technology so that they can be critical thinkers and be aware of who to talk to when upset or worried about what they have encountered regardless of the device, platform or app. Our curriculum is guided by the latest [Teaching online safety in school guidelines by the Department of Education; Education for a Connected World Framework; Keeping Children Safe in Education; CEOP Thinkuknow Programme](#) as well as [Be Internet Matters Program](#).

| | EYFS | Key Stage 1 | Lower Key Stage 2 | Upper Key Stage 2 |
|----------------------------|--|---|---|-------------------|
| National curriculum | <p>Personal, Social and Emotional Development</p> <ul style="list-style-type: none"> Show resilience and perseverance in the face of a challenge. Be confident to try new activities and show independence, resilience and perseverance in the face of challenge. Explain the reasons for rules, know right from wrong and try to behave accordingly. <p>Physical Development</p> <ul style="list-style-type: none"> Develop their small motor skills so that they can use a range of tools competently, safely and confidently. | <p>Computer Science</p> <ul style="list-style-type: none"> Understand what algorithms are; how they are implemented as programs on digital devices and that programs execute by following precise and unambiguous instructions. Create and debug simple programs. Use logical reasoning to predict the behaviour of simple programs. <p>Information Technology</p> | <p>Computer Science</p> <ul style="list-style-type: none"> Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts. Use sequence, selection, and repetition in programs; work with variables and various forms of input and output. Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs. Understand computer networks, including the internet, and how they can provide multiple services, such as the world wide web. Appreciate how [search] results are selected and ranked. <p>Information Technology</p> <ul style="list-style-type: none"> Use search technologies effectively. | |

| | | |
|--|--|---|
| <ul style="list-style-type: none"> Know and talk about the different factors that support their overall health and wellbeing e.g. sensible amounts of ‘screen time’. <p>Expressive Arts and Design</p> <ul style="list-style-type: none"> Explore, use and refine a variety of artistic effects to express their ideas and feelings. Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function. | <ul style="list-style-type: none"> Use technology purposefully to create, organise, store, manipulate and retrieve digital content <p>Digital Literacy</p> <ul style="list-style-type: none"> Recognise common uses of information technology beyond school. Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content on the internet or other online technologies. | <ul style="list-style-type: none"> Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information. <p>Digital Literacy</p> <ul style="list-style-type: none"> Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact. Be discerning in evaluating digital content. Understand the opportunities networks offer for communication and collaboration. |
|--|--|---|

| | | |
|--|---|---|
| United Development Goal and link: |  | How to support local farmers and producers. |
| |  | Every person has access to clean and safe water. |
| |  | To understand the need to save energy. |
| |  | Knowing how to promote local culture to encourage tourism. |
| |  | Understand the impact of providing internet access for all people. To develop an understanding of how infrastructure and innovation from the past and present can inform future choices. |
| |  | Learn more about climate change and the impact the human race has had on it. All nations must work together to combat climate change, for the benefit of people everywhere. |
| |  | There is a need to protect plant and animal life on land. |

|--------------------------|--|--|--|---|---|---|---|
| Computer Science: | <ul style="list-style-type: none"> To know how to repeat an action with technology to trigger a specific outcome. To be able to recognise the success or failure of an action. To be able to follow simple instructions to control a digital device. To know that we control computers. To be able to input a short sequence of instructions to control a device. | <ul style="list-style-type: none"> To be able to explain that we control computers by giving them instructions. To be able to create a simple program e.g. to control a floor robot. To be able to create a simple algorithm. To be able to predict the outcome of a simple algorithm or program. To be able to explain what an algorithm is – <i>a sequence of instructions to make something happen.</i> To be able to recognise that the order of instructions in an algorithm is important. To be able to debug an error in a simple algorithm or program e.g. for a floor robot. | <ul style="list-style-type: none"> To be able to explain that computers have no intelligence and we have to program them to do things. To be able to create a program with multiple steps e.g. to control a floor robot. To be able to predict the outcome of an algorithm or program with multiple steps. To be able to use loops and know they repeat sections of code. To be able to identify and correct errors in a given algorithm or program, and recognise the term debugging. To be able to plan out a program by creating an algorithm and evaluate its success. | <ul style="list-style-type: none"> To be able to predict the outcome of a block or text-based program (Scratch/Logo). To be able to modify an existing program successfully, e.g. change background, number of times things happen. To be able to trigger code with different events (when flag is clicked, when sprite is clicked) To be able to identify repeated steps in a program or algorithm. To be able to plan and write an algorithm to run a program. To be able to identify errors in a block or text-based program and correct them. To be able to use different inputs to control a program. | <ul style="list-style-type: none"> To be able to create a program using a range of events/inputs to control what happens. To be able to decompose a problem into smaller parts to help solve it. To be able use a count-controlled loop (e.g. repeat 3 times) to make a program more efficient. To be able to use a forever loops in programs. To be able to design a program for a purpose. To be able to debug common mistakes in programs. | <ul style="list-style-type: none"> To recognise that different solutions may exist for the same problem. To be able to predict what will happen in a program or algorithm when the input changes (e.g. sensor, data or event). To be able to use selection in algorithms in programs to alter what happens when a condition changes, e.g. if...then. To be able to create programs including repeat until loops. To be able to evaluate a program and make improvements to the code or design accordingly. | <ul style="list-style-type: none"> To be able to design and program a physical computing system that uses sensors. To be able to plan out a program in detail, including task, algorithm, code and execution level. To be able to debug common errors in programs and explain how to fix them. To be able to create and use simple variables, e.g. to keep score. To know key concepts (sequence, selection, repetition and variables) in a range of languages and contexts. To be able to name a range of sensors in physical systems. |
