

Year 1 - Summer – How has transport changed over time?

What I need to know by the end of this unit:

- There are different types of transport.
- Transport has changed over time.
- There are some similarities and differences between wheeled transportation of the past and the present.
- Trains were powered by different energy sources.
- The first passenger steam train was invented in 1829.
- There are different types of air transportation.
- The first aeroplane flight was in 1903.
- People have travelled to space and the moon.
- Transport has changed over time to improve safety and speed.

past

present

Key Vocabulary – Top 6!

- **Past** - things that have already happened.
- **Present** - things that are happening now.
- **Sequence** - putting things in the order they happen.
- **Similar** - almost the same.
- **Different** - not the same.
- **Retell** - to tell something again in their own words.

passenger
